

OPTION 2
"OUR FAMILY FOREST"
by DP Architects

Immerse within Nature.

"Our Family Forest" draws its inspiration from the lush woodland surroundings which gives the site its unique quality and setting for a contemplative and restorative club retreat set within nature.

Conceived as a series of pavilions and courtyards, the green courtyards form the distinguishing character surrounded by social and recreational components to encourage members to socialise, relax and forge communal and family bonds.

The new entrance provides an iconic entrance expression to invite members and visitors within. The building facade is built with timber in-grained concrete panels, providing an earthy tone and evoking a feeling of entering into a forest.

'A Family-centric Destination'

The new club amplifies the experience of being immersed in nature, with its architecture and material palette using natural materials such as timber - blending it seamlessly within the surrounding woodland. The programmes are clustered around the nature-infused courtyards to encourage members to socialise, congregate and forge stronger communal bonds.

FAMILY WATER CENTRE

The family water centre will form the new heart of the clubhouse with programmes such as a kids play area, dining areas and the club bar to be visually connected so that members can observe and immerse within an active and vibrant club environment.

DESIGNED BY:

DP Architects Pte Ltd

Profile:

DP Architects is a home-grown architectural practice evolving in tandem with the building of nationhood since the independence of Singapore. Founded in 1967 with a deep concern for the built environment and the need to create architecture of excellence, it aims to enrich the human experience and spirit through its planning and architectural works.

Growing from a single office of a dozen to 1,200 strong in fifteen offices worldwide, we have generated many significant projects over more than 40 years of continued operation; yet the process of critical self-renewal remains in our culture as we seek to stay meaningfully relevant to the society we serve. Driven by a strong philosophy devoted to human activity and civic quality of the city, our designers approach each project as the continuation of an ongoing exploration in shaping the public domain. In our pursuit to improve the lives of people in cities, DP explores design techniques that inject new vitality into the city's fabric. Our projects serve as regional focal points, hubs of human activity and social space.
